

A partnership of Transportation and Emergency Management, Supporting Traffic Incident Management / **Utah TIM Coalition meeting on November 21, 2024 at Taylorsville State office building 4315 S. 2700 W. Tuacahn Conference room 1400**

From 11am-2pm

Utah TIM Coalition:

Please RSVP for the next Utah Traffic Incident Management (TIM) Coalition meeting by end of the day Monday Nov. 18, 2024 to lee.perry@parsons.com. This coalition training meeting will be held on Thursday November 21, 2024, from 11:00 a.m. to 2 p.m. at Taylorsville State Office Building 4315 S. 2700 W. Tuacahn Conference room 1400.

This meeting is a unique opportunity to prepare for incidents during the winter driving season. We will be hosting a Snow-Plow School where we learn how UDOT prepares for and manages snow plow operations during a snow storm. It will help responders know how to better work with UDOT plows and make the roadway safer for everyone especially first responders. We will share some innovative ideas on how to improve safe, quick clearance.

Lunch will be provided, **so please RSVP** by Nov 18, 2024 so we will have enough food for those who attend.

We always encourage agencies to bring ideas or incidents to debrief at future TIM Coalition meetings.

The Utah TIM Coalition supports a vision of working together to “Promote, develop and sustain a multi-disciplinary TIM program that has a multi-jurisdictional focus to achieve enhanced responder safety, quick clearance and reliable interagency communications.”

Safe, quick clearance of existing crashes reduces the time and possibility of secondary crashes and, it also reduces the time that emergency responders are “at risk” while performing duties to clear the roadways. Safe, quick clearance is one of the most effective measures associated with Traffic Incident Management (TIM)
